LIBRARY REGULATIONS

(a) Books, periodicals and pamphlets may be borrowed by Fellows, Members, Licentiate Members, Associates and Affiliates personally or by a messenger producing a written order. The person to whom such publications are delivered shall sign a receipt for them in a book provided for that purpose.

(b) Publications may be borrowed through the post upon a written order. An acknowledgement of the receipt of such publications must be made on the form provided and returned to the Society immediately. Failing this, it will be assumed that the borrower has received the books, for which he will accordingly be held responsible. The postage of publications returned to the Society shall be defrayed by the borrower.

(c) A borrower may not have more than three publications in his possession at one time.

(d) A borrower will be considered liable for the value of any publication lost or damaged while on loan to him, and, if it be a single volume or part of a set, for the value of the whole work thereby rendered imperfect. Marking or writing in the publications is not permitted, and borrowers are requested to call attention to damage of this character.

(e) **Books and pamphlets may be retained for twenty-eight days. Periodicals may be retained for fourteen days. Applications for extension of the loan period must be made in writing before its expiry.** This loan period cannot be extended without application being made to the Secretary of the Society whose decision in this matter must be accepted as final and binding.

(f) Books and pamphlets added to the Library will not be lent until after the expiry of one month from the date received. The current number of a periodical may not be borrowed.

(g) Borrowers retaining publications longer than the time specified, and neglecting to return them when demanded, forfeit the right to borrow until they be returned, and for such further time as may be ordered by the Council.

Any borrower failing to comply with a request for the return of a publication shall be considered liable for the cost of replacing it, and the Council, may, after giving due notice to him, order it to be replaced at his expense.

No publication may be reissued to the same borrower until at least seven days have elapsed after its return, neither may it be transferred by one borrower to another.

(h) **Publications may not be taken or sent out of the United Kingdom.**

(i) Publications returned through the post must be securely packed and adequately protected.

EXPLANATORY NOTES

1. New or recent changes in presentation

(a) *Title of Volume*

From 1958 the title of this volume of the *Statistical Review* will be "*Part II, Tables, Population*".

(b) *Table omitted*

The former **Table E1**, showing stillbirths by sex and legitimacy, has been omitted. The figures are obtainable from **Table 23** in *Part I*.

(c) *New and revised tables*

In 1952 a new series of tables was introduced for the fertility analyses. Some of these were further modified in 1955 to 1957. Details are given in Note 5.

Deaths under 4 weeks and under 1 year have been omitted from **Table E**. They are obtainable from **Table 13** in *Part I*.

Table M has been extended to include the numbers of persons marrying in conurbations and remainders of regions. It now shows also the prior marital condition of men and women marrying, separately distinguishing the single, the widowed and the divorced instead of the combinations of groom's and bride's conditions, combining the divorced with the single.

A new series of tables of divorces was introduced in 1957, replacing the former **Tables P1** to **4**. They analyse the dissolutions and annulments of marriage made absolute during the year according to the following characteristics:

- P1.** Party to whom and grounds on which decree granted
- P2.** Present age of husband and wife (numbers and rates)
- P3.** Marriage ages of husband and wife in combination
- P4.** Wife's marriage age and duration (numbers and rates)
- P5.** Wife's marriage age and surviving children of present marriage
- P6.** Wife's marriage age and the marital condition of both parties before the marriage in combination.

In addition, the 1957 volume contained two supplements to these tables which, because of their complexity and consequent small cell sizes, it is intended to publish only at intervals of several years as more data accumulate:

Supplement to **Table P3**. Year of marriage and marriage ages of husband and wife in combination.

Supplement to **Table P6**. Husband's and wife's age at and marital condition before the marriage and calendar year of marriage.

Table SS has been modified to show the ratio of deceased men and women whose marital condition was not stated to the total number of deceased instead of to the number with stated condition.

The international **Tables W, X, Y** and **Z** (formerly **Q**) have been revised. **Table Z** now includes death rates.

2. Populations

The estimates of population appearing in this volume and described as "home" or "total" populations, have the following content:

Home population—the population, of all types, actually in England and Wales, distributed by area according to residence.

Total population—the home population *plus* members of H.M. Forces belonging to England and Wales and serving overseas but *excluding* the Forces of other countries temporarily in England and Wales.

The mid-1958 estimates of population, both national and local, have been based upon final figures from the full tabulations of the 1951 Census.

3. Births

The births recorded and analysed for England and Wales for periods from 1939 onwards are those which *occurred* during the period. The numbers *registered* in 1958 are shown in the footnote to **Table B**.

For the classification by area (**Table E**), the births have been assigned as in previous years to the home address or area of permanent residence.

4. Birth rates

The national rates shown in **Tables C and D** are obtained by relating birth occurrences to the total population (before 1939, birth registrations to the home population; in 1914–19, birth registrations to the total population), while the rates in **Table E** are based on birth occurrences and home populations (see Notes 2 and 3 above).

The crude birth rates for local areas in **Table E** (col. 8) may not be comparable one with another. In the first place, the populations on which they are based may contain different relative numbers of women of childbearing ages. In order to eliminate differences between local birth rates due to this cause an Area Comparability Factor is calculated (as described on page 30 of the 1954 *Statistical Review, Part III, Commentary**).

In the second place, the crude birth rates for local areas may differ because disproportionate numbers of women of childbearing ages are resident in mental institutions, where they are not, in fact, 'exposed to risk' of childbearing. In order to eliminate differences between local birth rates due to this cause also, the Area Comparability Factors mentioned in the previous paragraph are adjusted so that they also spread the numbers of women of childbearing ages in mental and mental deficiency hospitals over all areas of the country in proportion to the non-institutional populations.

The product of the crude birth rate and this adjusted Area Comparability Factor (col. 9 in **Table E**) is a rate which is standardised for sex and age structure—in particular for the relative numbers of women of childbearing ages—and, at the same time, makes allowance for the presence in or absence from the area of mental or mental deficiency hospitals with female patients of childbearing ages.

5. Fertility analyses

The fertility analyses in **Tables AA to TT** are based on information obtained under the Population (Statistics) Act, 1938, which operated from the 1st July 1938. **Tables AA to QQ** and **Table TT** are based on birth occurrences. **Tables RR** and **SS** are based on death registrations.

A new tabulation scheme was adopted for 1952 and subsequent years, and a fresh series of tables was introduced in the 1952 volume.

Tables AA to EE are, with a few modifications, similar to the corresponding tables in the previous series. **Table FF** (previously **GG**) includes live and still birth rates per 1,000 legitimate maternities. **Tables RR, SS** and **TT** correspond to those previously designated **VV, XX** and **YY**. The former **Table WW** is discontinued.

Table GG shows birth rates by age of mother for standard regions, conurbations and urban and rural aggregates; it also includes legitimacy, sex and stillbirth proportions which before 1952 were given in **Table HH**.

The analysis of legitimate maternities by mother's age, marriage duration and previous liveborn children in **Tables HH, II** and **LL**, is confined to maternities to women married once only. **Table MM** relates to legitimate maternities to women married once only, distinguishing parity, age and year of marriage for successive marriage cohorts.

Tables comparing the fertility of all married women and of those married once only and more than once respectively, were published in the 1955 *Statistical Review, Part III, Commentary†*.

Tables JJ and **NN** show estimates of women married once only, at risk of childbearing (a) in the calendar year 1958, by current age and marriage duration (**Table JJ**), and (b) between integral durations (wedding anniversaries‡) reached in 1957 and 1958, by calendar year of marriage and age at marriage (**Table NN**).

There is a fundamental difference between these two tables. **Table JJ** is needed for the calculation of legitimate maternity rates *per year of risk* (shown in **Table KK**). It gives the estimated *total numbers of years of married life* spent in the year at the ages and durations shown, and to each cell of the table a married woman contributes only the fraction of a year which she actually spent at that age and duration in 1958.

* Obtainable from Her Majesty's Stationery Office, price 8s. net.

† Obtainable from Her Majesty's Stationery Office, price 11s. net.

‡ The wedding date itself being duration 0 years.

(Most women contributed to several cells.) Table NN is needed for the calculation of legitimate fertility rates *per married woman* (shown in Table OO). It gives the mean numbers of women at risk at the specified durations who were married in the years and at the ages shown. Since 1956 it has related to the integral duration intervals ended in the year under review, spanning two calendar years of risk; in 1952 to 1955 it related to an integral calendar year of risk spanning two duration intervals.

Table MM was similarly modified in 1957; Table OO has been in this form since 1956 and in addition has been adjusted from maternity rates to live birth or fertility rates. It continues Tables 2 (a)—(g) of Appendix A in the 1955 *Statistical Review, Part III, Commentary**. Table PP shows mean family size (liveborn children) at integral durations reached in 1958, and continues Tables 1 (a)—(g) of the same Appendix.

In Tables AA, HH, II, LL and MM, the “not stated” cases have been proportionally distributed and included with the “stated” cases. Table QQ shows the numbers of cases so distributed and the proportions per 10,000 total legitimate maternities. Cases where the number of liveborn, now dead, children was not known by the informant at the registration of the birth have not been treated as “previous children not stated” since the current level of child mortality is sufficiently low to permit it to be assumed without risk of serious error that in these cases there were no such children.

6. Marriages

An analysis of marriages by manner of solemnization was included in the 1957 *Statistical Review, Part II†*.

In Table F, the numbers of marriages shown for local areas are those solemnized in the area. Statistics are for entire counties including their associated county boroughs.

7. Marriage rates

The national marriage rates of Tables C, D and H are based upon total populations (before 1939 home populations, in 1914–19 total populations) (see Note 2 above).

8. Deaths

The deaths recorded (Tables E, RR and SS) are the total registered (i.e., including non-civilians) in the calendar period, the time lag between the date of occurrence and the date of registration being usually only a day or two. They have been assigned to the area of usual residence of the deceased. Accommodation provided under Parts III and IV of the National Assistance Act, 1948 is regarded as the place of residence of persons dying there. Before 1st January 1958, chronic sick and mental and mental deficiency hospitals were similarly treated for this purpose but from that date the method of classification was modified, the main change being that a death in such a hospital is now assigned to the area of occurrence only if the deceased had been there six months or more. If the deceased had been there less than six months the death is transferred to the area of previous usual residence.

In some small areas the numbers of deaths may also have been appreciably affected by the *opening, closing or change of use* of certain institutions, so that figures may not be comparable with those of earlier years.

9. Death rates

The general death rates of Table E are based on total deaths and home populations.

The crude death rates for local areas in Table E (col. 14) may not be comparable one with another. In the first place, the populations on which they are based may have widely differing structures by sex and age. In order to eliminate differences between local death rates due to this cause an Area Comparability Factor is calculated (as described on page 57 of the 1954 *Statistical Review, Part III, Commentary‡*).

In the second place, the populations on which the crude death rates are based may include a disproportionate number of invalids if there are certain types of hospital in the area. In order to eliminate differences between local death rates due to this cause the Area Comparability Factors mentioned in the previous paragraph are adjusted so that they also spread the deaths and the populations in chronic sick, mental and mental deficiency hospitals over all areas of the country in proportion to the non-institutional populations.

The product of the crude death rate and this adjusted Area Comparability Factor (col. 13 in Table E) is a rate which is standardised for sex and age structure and, at

the same time, makes allowance for the presence in or absence from the area of chronic sick, mental or mental deficiency hospitals.

10. Migration

Table S shows various data on migration and balance of civilian passenger movement. Parts (a) and (b) are compiled from Board of Trade returns.

Part (a) shows balance of civilian passenger movement and relates, with certain shown exceptions, to travel by all routes to and from the United Kingdom. Part (b) shows balance of permanent migration and relates to travel by the long sea routes only. The permanent migration balance of part (b) is included in the passenger movement balance of part (a).

In parts (a) and (b) the United Kingdom includes the Irish Republic prior to 1st April 1923. Inward balances are distinguished by a *plus* sign and outward balances by a *minus* sign.

In part (b) the terms "permanent migration" and "long sea routes" have the following meaning:

Permanent migration — a declared intention by the passenger to reside for more than a year in the country of destination.

Long sea routes — excluding travel to and from all ports in Europe, which is taken for this purpose as including all Mediterranean islands, all ports in Turkey and all ports in the U.S.S.R. other than those on the Pacific seaboard.

Part (c) shows the intercensal population balance by migration for England and Wales. This is obtained by deducting the excess of births over deaths, the natural increase, from the intercensal increase of population. Net gains by migration are shown by a *plus* sign and net losses by a *minus* sign.

11. Register of electors

Table U shows the numbers of parliamentary electors on the February 1958 Register for each parliamentary constituency as constituted at the date of the general election held on 26th May 1955. The numbers of votes cast at by-elections held on the February 1958 Register and the acreage of each parliamentary constituency are also shown.

The numbers of local government electors are shown in Table V with an analysis of local elections.

12. International tables

Information for the completion of Tables W, X, Y and Z has been obtained from United Nations publications and from official sources.

13. Changes in boundaries

Areas which have undergone a change of boundary during the year are identified in Table E by an asterisk(*); areas created during the year are identified by the sign (†), while areas abolished are indicated by the sign (‡). Statistics shown for the year for such an area relate to the area as constituted in the respective parts of the year before and after the boundary change; in consequence the base population used in Table E for the calculation of birth and death rates, which must be a weighted average of the populations for these two parts of the year, may differ from that included in Part (iii) of the Appendix and Table A4 which relates to the area constituted *after* the boundary change.

14. Indication of significance

Rates based upon less than 20 events are distinguished by italic type as a warning to the user that the smallness of the experiences may affect their significance (see page 9 of the 1936 *Statistical Review Text*).

Rates given as 0 indicate that the actual rate is less than one half of a unit. A dash (—) in any column indicates that there were no events.

15. Definition of areas

London A.C.—Administrative County of London which consists of the City of London (including the Inner and Middle Temples) and the metropolitan boroughs.

C.B.—county borough; M.B.—municipal borough; Met.B.—metropolitan borough; U.D.—urban district; R.D.—rural district.

16. Standard regions

The constitution of the standard regions of England and Wales used in this volume is as follows:

REGION I <i>Northern</i>	REGION IV <i>Eastern</i>	REGION VI <i>Southern</i>	<i>Wales II (remainder)</i>

18. Urban and rural aggregates

Urban and rural aggregates relate to aggregates of conurbations, and of areas outside conurbations. The latter are subdivided into (a) urban areas with (i) populations of 100,000 and over, (ii) populations of 50,000 and under 100,000 and (iii) populations under 50,000 (for this purpose areas are allocated according to the size of their enumerated population at the 1951 Census), and (b) rural districts. "Urban areas" includes boroughs and urban districts as defined under the Local Government Acts, and rural districts are as defined under those Acts.

See explanatory note 2.

These projections have been prepared by the Government Actuary's Department
in consultation with the General Register Office

is: Mid-1958 estimate of Total population of England and Wales (including members of H.M. Forces belonging to England and Wales and serving overseas but excluding the Forces of other countries temporarily in England and Wales).

assumptions (1958 Revision):

Mortality: At ages under 45 death rates declining steadily over the next 25 years until at the end of that period they are about one-half of the rates now being experienced. At ages over 45 the assumed rates of decline become progressively smaller as the age advances. It has been assumed that after 25 years the death rates at all ages will remain at the levels then reached.

Fertility: In view of recent marriage and fertility experience the assumptions made in the previous projection have been modified. The revised estimates give annual births averaging 725,000 in the first 5 years, 740,000 in the next 10 years, rising gradually to 790,000 in 1997 and thereafter. (M/F ratio 1.06 throughout.)

Migration: Nil.

Projections involving children yet unborn are shown above the dotted line

TABLE M. Persons marrying in 1958, ages and conditions

England and Wales, standard regions, Wales and conurbations

Note. Within a standard region the separate figures for conurbations and remainders of regions are approximate, relating to groups of registration districts most nearly corresponding to the areas defined in *explanatory notes 16 and 17*. The mid-1958 home populations of these groups differed from those of the defined areas by the following percentages:

Tyneside Conurbation	+ 4.86	South East Lancashire Conurbation	+ 0.62	West Midlands Conurbation	+ 2.16
Remainder of Northern Region	+ 1.75	Merseyside Conurbation	— 0.08	Remainder of Midland Region	— 2.12
West Yorkshire Conurbation	+ 4.37	Remainder of North Western Region	— 0.52	Greater London Conurbation	— 0.62
Remainder of East and West Ridings	— 3.02			Remainder of South Eastern Region	+ 1.83

Note. The deaths included in this table, as in all tables of the *Statistical Review*, are those which occurred in England and Wales. The numbers which occur outside England and Wales are not generally large enough to be of much significance except for certain years, e.g. for the periods 1914-18 and 1939-47 deaths of non-civilians and merchant seamen which occurred outside England and Wales are estimated at 577,000 and 240,000 respectively.

* These figures relate to passengers to and from ports in the Irish Republic and ports in the United Kingdom. The movement over the land frontier between the Irish Republic and Northern Ireland cannot be furnished.

† Approximate figures only.

†† Excluding air passengers prior to 1949.

‡ Excluding air passengers.

§ This figure cannot be reconciled with the separate totals because it includes air movement which cannot be allocated to specific areas.

¶ From 1956 includes passenger movement to and from the privately operated airports of Southend and Ferryfield.

(b) Balance of permanent migration. Citizens of the Commonwealth and the Irish Republic travelling by the long sea routes only.

TABLE U. Parliamentary electors on the February 1958 Register, with number of votes cast at by-elections held thereon (shown in footnotes)

England and Wales, county and borough constituencies

Note. (1) The Register of electors 1958, was prepared in respect of the qualifying date 10th October 1957, and came into force on 16th February 1958. The figures are for constituencies as constituted at the date of the General Election held on 26th May 1955. The figures given in columns 6, 7 and 8 relate to persons entitled to vote at elections held on or after 2nd October 1958; they are not included in columns 3, 4 and 5.
(2) For constituencies whose boundaries have been altered by Orders in Council made since 26th May 1955, which become effective at the next General Election, the total electorates which will follow redefinition are shown in footnotes.

Provisional. † Not available.

Excluding civilian citizens of continental United States absent from the country for extended periods of time.

Federated 3rd January 1958.

Including armed forces stationed in the area.

Excluding Indian jungle population.

Official rate estimated from comparison of 1940 and 1950 census returns for population born in Brazil.

Birth statistics based on baptisms recorded in church registers; death statistics based on burial permits.

Excluding liveborn infants dying within 24 hours of birth.

Official estimate.

Data for 55 towns only having a present population of approximately 2 million.

Based on results of a rural sample survey.

Excluding non-resident military and shipping personnel.

Estimated from a survey of about 5 per cent of population.

Excluding armed forces and foreigners. Excluding liveborn infants dying before registration of birth.

Including data for Kashmir-Jammu.

Official rate, estimated from comparison of 1941 and 1951 census returns.

Data for 79 registration units in Java only. The official estimate for Indonesia is "around 40" for births and "around 20" for deaths.

Census count.

¹¹ 1920-24 rates are averaged on years 1921-24. Before 1947 excluding territory ceded by Italy in 1947.¹² Before 1950 excluding Yukon and North West Territories, and Newfoundland.¹³ Births for 1951-54 and 1956, final tabulations were based on a 50 per cent sample.¹⁴ 1920-34 rates based on births registered within 2 years of occurrence. 1946-50 data are estimates based on population enumerated at 1952 census and death statistics 1946-52.

Beginning 1951, data are births by date of occurrence but include an upward adjustment for under-registration of 8.8 per cent for 1951 and 5 per cent for 1952, 1953 and 1954.

¹⁵ 1920-24 rates are averaged on years 1921-24. Before 1947 registration area of former British Provinces (about 75 per cent of former India, not including Burma), but excluding East Bengal in 1946. From 1947 registration area of Republic of India. For 1953 data for Aimer are excluded; for 1955 data for Bihar, Madhya Pradesh and Orissa are excluded.¹⁶ From 1945 Japanese nationals in Japan only. From May 1952 including Tokara Archipelago and from 1954 including Amami Islands, both acquired from Ryukyu Islands in 1951 and 1953 respectively.¹⁷ Excluding full-blood aborigines.¹⁸ Excluding alien armed forces stationed in the area.

Note. The term "maternity" is used to denote a pregnancy which has terminated in the birth of one or more live or still born child(ren), the definition of a stillborn child being that contained in Section 41 of the Births and Deaths Registration Act, 1953. The maternity record differs from the birth record in that multiple births from a single pregnancy are counted as one maternity, while for the birth record each child born is reckoned as a separate unit.

TABLE II. Legitimate maternities to women married once only }
by mother's age at maternity and marriage duration

{ England and Wales
1958 occurrences

- Note. 1. The classification by marriage duration now presented differs from that of 1951 and earlier years. As the month only and not the day of the mother's marriage is obtained at a birth registration the marriage duration cannot be exactly identified. The assignment procedure is now designed to secure that numbers shown in the table correspond as nearly as possible to the durations to which they are assigned.
2. Cases in which the mother's age or year of marriage were not stated (see Table QQ) have been proportionally distributed and included with the stated cases.

**TABLE RR. Infertility of deceased married women }
by certain causes of death**

**{ England and Wales
1958 registrations**

Note. The columns distinguish deaths according to whether the deceased was reported

(a) as having had no children by any husband, i.e. infertile,

(b) as having had children by a husband, i.e. fertile.

Deaths in which the record of fertility was not reported are excluded from the table.

An asterisk (*) denotes that the total number of cases (infertile plus fertile) was less than 50 and that in view of the unreliability of inferences based on small numbers, proportions have not been calculated. Proportions based on between 50—250 cases are shown in *italics*.

The Registrar General's Annual Estimates of the Population of England and Wales and of Local Administrative Areas

An annual publication issued to meet a general demand for the latest figures of populations of local administrative areas, county boroughs, administrative and geographical counties, standard regions and conurbations. The latest estimates of the population of England and Wales as a whole, by sex, by single years of age to age 20 and by five year age-groups thereafter, are also given.
